Sud Academy Update

December 2021

Much has happened during 2021 at Sud Academy! We're grateful to God that people gave generously last year, and we were able to rebuild the classrooms to higher ground. Staff and students alike have enjoyed the improved learning environment this year.

What a difference a year makes! New and improved classrooms have really benefitted our staff and students.

Beatrice Nabwile is a secondary student at Sud Academy. She says that "it was tough to manage learning in the old classrooms, but now because of the new classes, we can learn smoothly". She expressed her gratitude by saying "I personally would like to say thank you, thank you, thank you!" Staff have also expressed their appreciation, and have told us there is less absenteeism amongst students. Previously, pupils may have skipped school after rainy weather, as they knew their classrooms would be flooded. Now, that isn't a problem any more.

The purpose of Sud Academy is to educate urban refugee students from South Sudan that have moved to Nairobi. Some students are local Kenyans, as this helps the school integrate into the neighbourhood. Lino Kuor is a student that has moved to Nairobi from Kakuma refugee camp in northern Kenya. Many refugees find life difficult in the camp, due to the lack of food and harsh living conditions there. He joined Sud Academy last May to begin his high school journey. His message to donors is to continue to support the school so the learning can continue into 2022.

Please consider partnering with us so we can continue to provide an education to these young people with so much God-given potential! Cheques can be made out to "Christian Mission Aid Canada" and should say "Sud Academy" on the memo line.
